

Issues

"Free time activities"	Homes	Mobility	Energy sources	Communication
High energy consumption for ski lifts, snow guns, lights and pist machines	Oil heating system	To less charging stations for electric cars	Weather dependent=changing energy prices	No available information about energy issues in Horgen is targeted towards the younger generation
	Gas heating systems	Very few electric cars	Low adoption of solar panels	Millenials and generation Z are willing to make a change, but they don't know how
	High prices makes it hard from people to heat up their houses	Poor availability of public transport (Countryside)	Reliance on fossil fuels	Hard to find information about issues and the "improvement work"
	Power failures because of extreme weather	High petrol prices= hard to commute on the countryside	1/3 of energy is nuclear power	Political issues make it harder to solve energy issues
		No public transportation to the next big city (Zug)	Law on energy export	
		Too much traffic in city center	Only 0,7% of produced electricity is solar	
		People on the countryside are dependent on their cars		
		An increasing amount of younger people buy cars, because public transportation is poorly executed
